HB-VT08

Video Telematics System

Smart video monitoring for vehicle fleets

CE

About the HB-VT08

HB-VT08 is an advanced video telematics system combining 4-channel smart video monitoring, ADAS, DSM and passenger monitoring. It is a comprehensive solution for fleet safety, driver behaviour analysis and road safety.

Where it is used

- Logistics vehicles
- Passenger coaches
- Tankers
- Commercial vehicles
- Shuttle vehicles

Key features

- 4-channel smart video monitoring
- ADAS, DSM and passenger monitoring cameras
- Speed limit sign recognition (traffic sign detection)
- IP65: protected against dust and low-pressure water jets
- Built-in backup battery

Specifications

Built-in storage	
Storage options	256 GB / 512 GB

Battery	
Built-in backup battery	2,950 mAh

Interfaces	
Digital inputs	3
Digital outputs	1
RS232	1
SOS button	1

Operating environment	
Operating temperature	−30 °C to +70 °C
Protection rating	IP65

Certifications and standards

CE

Complies with safety and environmental protection standards.
